Thanks, Ming! Not completely well yet, but at least not dying.

Can we have the demo tentatively 2 weeks from when we get back, say either Monday, April 1 or Wednesday, April 3 from 3:30 pm to whenever? Will that work? It also depends on when the mylar gets here.

Let me know and we can confirm later as we get closer to the date.

Looking forward to it!

Thank you.

Hi SE,

That should be the right one! Glad to hear you are feeling better.

Best,
Ming

Hi Ming,

I just went ahead and emailed Christina to order 40 sheets of the following:

55521-1069 Drafting Film Matte, 2-sided 0.005", size 18" x 24" sheet at \$3.29 each (for 25+)

That sounds right?

I decided that I shouldn't be so lame and I should just do it myself (via Christina) since I'm not on my death bed! But thank you, for offering. I appreciate it!

If this is not the right one, please let me know ASAP!

Thanks again.

Hi Ming,

Thank you for the offer! That would help me out tremendously. 😊

Let me get back to you over the weekend. I have to figure out the schedule for the projects that are left before I can decide on the size. I also need to look at my class budget, have to put aside enough money for supplies for the final project.

Will get in touch soon.

Thanks!

Hi Soon Ee,

I hope you are feeling better. I will be happy to purchase the mylar paper on your behalf. There are two different sizes that are 2-sided and .05 mm : 24"x36" (\$6.78/each) and 18"x24" (\$3.69/each). Do you have a preference as to which one you want to purchase? Also how many of each should I order?

Best,
Ming

Hi Ming,

Thanks for the info. and the suggestions!

Will check out the mylar on Dick Blick when I get the chance.

I'll revise one of my assignments to fit the medium, perhaps the time-travel project where the students have to come up with some sort of imaginary scape: landscape, cityscape, etc.

Will figure out a date for the demo and check back with you. It may take awhile 'tho, most likely!

Thanks again,

SEe

Hi SE,

Here is the link for the mylar, also known as drafting film:

<https://www.dickblick.com/products/grafix-drafting-film/>

I would strongly suggest that you purchase the .005 mm as the .003 mm tends to wrinkle easily. Since the paper is translucent, you may also want to purchase or have large sheets of white butcher paper on hand for the students. They can use the white sheet of paper as a backing. Let me know if you have any questions!

Looking forward to the demo.

Best,
Ming
